Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 19-37 are objected to because of the following informalities: The use of the word 'type' should be removed from the claims for clarity. See MPEP 2173.05(b). Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 19-36 rejected under 35 U.S.C. 102(b) as being anticipated by Horii et al. (US 6,253,868). Horii discloses a saddle riding vehicle comprising:

a head pipe (3);

a body frame including a mainframe (5) that extends obliquely downward to the rear of the vehicle and a pair of subframes (40, 50), which are bent convexly downward (see Fig. 3, subframes are part of 33), that are connected to the mainframe;

a motor (8) supported by and suspended from the mainframe and subframes (Fig. 2) in two locations;

wherein a connecting portion of the mainframe and subframes is located ahead of a portion of the mainframe supporting the motor (Fig. 2);

and a cross sectional area of the mainframe changes in the longitudinal direction (Fig. 3), such that the forward end is larger than the rear end;

wherein both a portion of the motor and the rear arms (14) are supported at rear ends of the subframes (Fig. 1);

rear side frames (Fig. 2, represented by hidden lines) extending upward to the rear of the vehicle and connected to the subframes, and the motor is supported in a location adjacent to that connection.

Horii also internal combustion engine (col. 2, ln. 63-67) with an air cleaner (10) and crankcase (13) and a cylinder that extends obliquely upward to the front of the vehicle (Fig. 2), in addition to left and right brackets (21L, R) and a pivot shaft (15) which penetrates through the brackets, rear arms and the motor.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 37 is rejected under 35 U.S.C. 103(a) as being unpatentable over Horii in view of Imani (US 4,445,585). Horii discloses as discussed above, in addition to an air cleaner (**10**), but does not directly disclose a battery. Imani discloses a motorcycle with a battery (**53**). Therefore, it would have been obvious to a person having ordinary skill in the art at the time of the invention to modify Horii as taught by Imani in order to provide a source of power for the vehicle.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Uneta (789), Nagashii (658), Yokomizo (157), Okabe (334), Miyahsiro (852), Yamigawa (677), Kurayoshi (869), and Kishi (555).
